DETAILED ACTION

1. This office action is in response to Applicant's amendment filed on 4/18/2005.

Claims 1, 8, 15 and 22 have been amended. Claims 1-25 are pending.

Allowable Subject Matter

2. Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to providing recording medium for recording a digital audio signal. The closest prior art, Shikakura (U.S. Patent Nol. 5,594,598) and Akiyama et al. (U.S. Patent No. 5,812,663), discloses block encryption process having a predetermined data length selected to provide maximum recording time on a recording medium and a maximum encryptable data length of the digital audio signal. A compressor to compress the digital audio signal at a compression ratio selectable in a predetermine range. Shikakura and Akiyama, however, do not disclose the selection of the predetermined data length provides an encryption process that is free of fractions to provide maximum recording as specifies in Specification pages 87, lines 4-18. This feature is recited in every claim. The art of record either singularly or in combination fails to anticipate or render the claimed limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
